

Mybrid IGT Veneto Rosso

ORGANIC & RESISTANT WINE

THE NAME

Mybrid, our first wine made from resistant vines. After years of study and research, we have obtained the first vintage of Merlot Khorus, a particular resistant grape against fungal diseases like powdery mildew and downy mildew.

Since 2023 we are associated with PIWI, an international organization of wineries particularly dedicated to the cultivation of these grape varieties, which require a very limited number of phytosanitary treatments, being naturally resistant or tolerant to fungal diseases. This directly protects the environment because very little pesticide is released into the environment. Significantly fewer treatments for fungal diseases mean fewer passages, significantly less need for pesticides, less soil compaction, less CO2-Emission, significantly lower treatment costs, less danger to the health of the user!

The label features a hand-drawn poetic illustration metaphorically represents William Savian's dream: a natural environment where the protagonist is the vineyards, which like a tree welcomes all living beings, plants, animals and men who live together in a perfect balance.

ORGANOLEPTIC CHARACTERISTIC

Intense ruby red with light violet hues. Intense violet floral aroma, red berries such as blackberries, raspberries, currants, blood orange peel up, ending with marjoram and a memory of pine needles. The sip it is fresh, with tannins very lively, with hints of cardamom and vegetal hints. Very pleasant spicy finish.

SERVING SUGGESTION

Excellent paired with red meats such as roasts and braised meats, game, italian traditional first courses such as lasagna or cannelloni with meat sauce and medium-aged cheeses.

DID YOU KNOW?

All our glass bottles have Family emblem printed and three lines symbolize the third generation that is carrying the management.

Glass stopper, infinitely reusable in all our bottles and completely recyclable.

A small step in the search for new alternatives to the use of cork for bigger responsibility for the consumer.
